Questionnaire for designing an integrative OR system/ a connected OR:

What are your requirements for an integrative OR system? This questionnaire helps you determine the most important key points and serves as a base for discussing the design of the system. We gladly assist you in specifying your requirements in a one-on-one consultation.

1. Image Management (arranging of images in OR)

number of video sources used (endoscope, C-arm) sources

video sources:

number of monitors desired monitors

Would you like ...

... vital patient information displayed on monitors? yes no

... a room camera or an OR light camera integrated in the system? RC OR LC

2. Equipment Management (controlling single pieces of equipment)

Do you want your system to ...

... control medical equipment (endoscope, HF-surgery, operating table, etc)? yes no

... control home technology (lighting, blinds, air conditioning, etc.)? yes no

... access audio feeds; receive web radio (play music)? yes no

3. Tele Communication (communication, conferences, consultation with questions)

Do you need technology for ...

... telephone services (phone to phone)? yes no

... video streaming (inside your building, room to room/PC to PC)? yes no

... video streaming (outside your building, across the country or world)? yes no

4. Data Management / documentation (saving images and videos)

What is especially important for you as far as your data is concerned?

access to patient information (KIS, PACS, ...) yes no

local saving of data (recording function) yes no

central saving of data on a server (archive) yes no

set up archive database for research yes no

set up digital patient record yes no
